December 22, 2021

Dear parents -

This is a reminder that the Health Department of Puerto Rico is requiring that all students 5 years of age and older must complete a full vaccination process by January 31 to continue on-campus instruction. A full vaccination process is defined as receiving both doses two weeks before the deadline date, taking into consideration that 2 weeks are required for the 2nd dose to be in full effect.

For your child to meet this timeline, it is imperative that the **first vaccine be administered by December 28th, 2021**, so please keep this in mind as you plan your child's vaccination appointments.

Any medical or religious exemption must be officially processed before the deadline date:

- Medical: Official Health Department document must be completed by a PR certified Doctor. Once the school receives this document, it is submitted to the PR Health Department for approval. Until it is approved, the child may not attend school.
- Religious: Official Health Department document must be completed by a Pastor with an accompanying legal affidavit.

As of February 1st, the Health Department requires that all students meet the obligatory vaccine requirements to attend on-campus learning, and since the start of the 2021-22 academic year, we have transitioned to a 100% on-campus model, so it is imperative for all students to meet the vaccination requirement by January 31.

Please send documentation to covidtest@caribbeanschool.org when you have completed the requirements, so that the nurse can register your child's clearance in our system.

Gloria Santana
